

July 24, 1967

Mr. A. W. Hook  
Superintendent of the Laboratories and Sampling  
Anaconda Aluminum Company  
Columbia Falls, Montana 59912

Dear Warren:

Under separate cover I am transmitting, by bus, thirteen [13] samples - 1 single sample and 6 pairs of samples.

The 6 pairs represent samples for fluorine which were taken in series. These samples should give us some indication as to the efficiency of the impingers.

The attached data sheet is descriptive of the samples.

In the not too distant future, I will be transmitting some filter paper samples for particulates from miscellaneous areas.

I am most grateful for your help in analysing these samples.

I will soon be writing to you and Mr. Woster regarding related matters which we discussed.

With every best wish and kindest personal regards, I am

Sincerely,

John W. Warren  
Director.
